Certificate Course on Sustainable Environment Management (Seventh Batch - August, 2025)

ABOUT THE COURSE

This online certificate course provides a general introduction to environmental sustainability and touches on the science, concepts, and strategies used to “green” businesses, organisations, and individuals’ lifestyles.

Modern consumers are demanding sustainability from organizations where they utilize or buy goods and services and in which they invest.

Modern management and policy leaders, then, need to know what environmental sustainability is and which tools are available to improve the footprint of their organizations and businesses.

Last date of registration: 8th August, 2025

Class Begins on: 14th August, 2025

Class Ends on: 20th September, 2025

REGISTER NOW!

<https://forms.eduqfix.com/stsertc/add>

Certificate Course on Sustainable Environment Management

PREAMBLE:

Industry has a curious relationship with the environment. Rapid industrialization coupled with uncontrolled exploitation of natural resources has affected the environment, by ultimate changes in the natural cycle, causing impact and /or effects on air, water, land, flora, fauna, human settlement, and health of people.

This online certificate course with 23 modules and 46 hours is developed for mid-level to senior level industry professionals to provide a knowledge on environmental sustainability and touches on the science, concepts, and strategies used to “green” businesses, organizations, and individuals' lifestyles. The course provides an understanding on ESG-specific topics such as disclosure indices, materiality assessments, UN-SDGs and other associated sustainability initiatives, GRI standards, sustainability reporting in CDP disclosures, TCFD, Climate Change, Planetary Boundaries, Nature based solutions, circular economy, LCA, Structure of BRSR, BRSR/BRR, NGRBC principles, Greenhouse Gas (GHG) emissions (Scopes 1, 2, and 3 calculations), water neutrality, ERP, ESG Rating Support (CDP, DJSI, MSCI, Ecovadis), Artificial Intelligence and Data Analytics for Sustainable Solution, Value Chain Aspects, Value chain and related disclosures under BRSR, Sustainability strategies and goals, Net Zero and SBTi Target Setting & Advisory, Industry specific case study etc.
