Educational Visit to Rural Public Health Infrastructure and Community Healthcare System

Students of the MBS-PS Hospital & Health Management (HHM) 2nd and 4th Semester from the Indian Institute of Social Welfare and Business Management visited the Rural Health Unit and Training Centre under All India Institute of Hygiene and Public Health on 26th February 2026, accompanied by faculty member Mr Sandip Ghosh.

The educational visit was organised to provide students with practical exposure to rural healthcare delivery systems, community health services, and public health management practices at the grassroots level. During the visit, students gained valuable insights into preventive and promotive healthcare activities, maternal and child health programs, immunisation services, sanitation initiatives, and the functioning of primary healthcare infrastructure in rural settings.

The students also interacted with healthcare professionals and staff members of the training centre, which helped them understand the challenges and opportunities involved in rural health administration and community-based healthcare management. The visit proved to be an enriching learning experience, bridging theoretical knowledge with real-life public health practices and strengthening the students' understanding of rural healthcare systems in India.
