World Health Day Celebration

World Health Day (April 07, 2026) was organized by HHM Students, featuring a National Seminar on Health, Public Systems, and Development (Hybrid Mode) which witnessed the participation of Scholars and Students from Tata Institute of Social Sciences, University of Delhi, Indira Gandhi National Open University, Techno India University, and Bangabasi College under University of Calcutta. The programme included deliberations from experts Prof. (Dr.) Suptendra Nath Sarbadhikari (Chief Medical Information Officer) at HlthTek, Dr. Dhiman Ganguly (Eminent Pulmonologist), Dr. Abdul Rohim Tualeka (Department of Occupational Health and Safety, Faculty of Public Health, Universitas Airlangga, Indonesia). The experts from industry who engaged with the participants included Prof. Keerti Bhushan Pradhan (Consultant, Healthcare Innovation and Strategy), Roli Verma, (Regional Head (South and East) HR, Narayana Health), Kakan Guhathakurta, (Unit Operations Head, Manipal Hospital, Mukundapur, Kolkata).

An interactive session on World Health Day allows healthcare management students to step into the shoes of global administrators through live crisis simulations. This hands-on environment teaches them to balance tight operational budgets with evidence-based medicine and equitable care delivery. By actively debating policy and analyzing systemic barriers, students learn to view healthcare not just as a corporate structure, but as a dynamic public service. Ultimately, it transforms global health values into a practical, empathetic blueprint for their future leadership careers.
